

## Searching on Facebook

Using the **search the register** option through Facebook you can find details of companies – both New Zealand companies and companies on the overseas register.

- To view instant results on screen just begin entering your search criteria into the **Search** field on the Companies Office Facebook page.

For a company search this might be the company's name (either the current name or a previous name) or the company's incorporation number.

- A list of possible matches will be displayed on screen and you can click on any one of these results to view the details of that company.
- Click on the **Company Search** button to display the complete search results for your search criteria.
