

Stage 8 - Review

Reviews are an important part of the overall procurement process. A review can improve procurement management and demonstrate public accountability by providing an honest independent appraisal of the procurement, the delivery against the contract and the outcomes achieved.

A review provides an opportunity to check if the anticipated benefits have been achieved, and if there are opportunities for improvements in what we do and how we do it.

Below are some specific guides, tools, templates and training relevant to this stage in the procurement lifecycle. These resources are not intended to be an exhaustive list. We recommend you read the [Guide to Mastering Procurement \[1 MB PDF\]](#), which covers this stage in detail, within the context of the end-to-end lifecycle.
